

# TSEPO MATHELELI

## SOFTWARE DEVELOPER | PYTHON & SQL SPECIALIST

Johannesburg, South Africa | [tsepomatheleli@icloud.com](mailto:tsepomatheleli@icloud.com) | 27692424254 | [LinkedIn](#)

---

### PROFILE

Software Developer with over 4 years of experience in building scalable, client-facing systems and full-stack data solutions. Proven track record in optimizing backend infrastructure, reducing billing processing times by 94%. Expert in Python (Django, Flask, FastAPI) and SQL, with a focus on high-availability API development, automated workflows, and integrating AI-assisted development tools to improve delivery efficiency.

---

### PROFESSIONAL EXPERIENCE

**Software Developer, The Dynamix Team (Contracting for Betway)** **Oct 2025 to Present**  
Johannesburg

- **Payment Integrations:** Own the end-to-end lifecycle of third-party payment APIs and internal system migrations using Python and SQL for the African market.
- **Agile Delivery:** Collaborate within an Agile/Scrum environment with Product Owners and BA's to ensure high-quality releases for the Betway application.
- **System Reliability:** Coordinate with regional teams (South Africa and Mozambique among others) to implement maintenance updates and resolve production issues.
- **Leadership & Mentorship:** Act as a technical reference point for peer debugging sessions and architectural discussions to drive team efficiency.
- **Process Optimization:** Advise leadership on meeting cadences and internal workflows to improve overall team velocity.

**Python Developer, ADEI** **Nov 2022 to Sept 2025**  
Johannesburg

- **Automation:** Engineered an automated billing system that reduced processing time from 12 hours to 45 minutes using Python-based microservices.
- **Scalability:** Rebuilt fragmented WhatsApp bot scripts into a unified, scalable engine, improving maintainability and onboarding speed.
- **Architecture:** Redesigned legacy database systems by leveraging Data Lakes and Warehouses, significantly improving data scalability.
- **BI Solutions:** Designed Power BI reporting solutions for senior stakeholders, transforming raw data into actionable business insights.
- **Mentorship:** Led technical discussions and peer-programming sessions to standardize debugging workflows.

**Data Science Intern, 2U** **Mar 2022 to Oct 2022**  
Cape Town

- Analyzed student behavior and course repetition patterns using statistical methods, providing actionable insights to stakeholders.
- Conducted sentiment analysis on student review responses using NLTK, enhancing understanding of feedback trends.
- Developed a marketing dashboard using Tableau to visualize key performance indicators and granular data characteristics, enabling data-driven decision-making.
- Collaborated on data wrangling projects to enhance machine learning models for improved advertisements.
- Created interactive dashboards using Tableau to visualize sales data and identify trends for strategic decision-making.

---

### ADDITIONAL EXPERIENCE

**AI-Powered Productivity System** **Jan 2023 to Apr 2023**

- Developed a task management platform using ChatGPT for intelligent task breakdown and project planning.
- Implemented natural language processing (NLP) to convert user descriptions into structured tasks.
- Built on Azure infrastructure with Django (back-end APIs) and React (front-end).

**Car Rental Management System** **Sept 2024 to Feb 2025**

- Designed and built an MVP for fleet management and logistics tracking using Flask, Streamlit.
- Integrated a WhatsApp bot for daily operational requirements, reducing over 90% of manual labour of daily tasks.
- Hosted system on AWS EC2 and RDS, handling user management & data storage.

---

## EDUCATION

---

### Umuzi

N5 Information Technology Systems Development,  
Johannesburg

Certificate in Data Science

May 2021 to Feb 2022

### Central University of Technology

IT: Software Development (Incomplete)

Feb 2013 to Nov 2019

### Brebner High School

Matric, Bloemfontein

---
